

Secretary DIT, GoMP, appreciates i-GeoApproach Application

i-GeoApproach, i.e., Internet Geomatics–based Application for Planning Rural Road Connectivity to Habitations (Under PMGSY), is an enterprise solution on SOA architecture offered by Geomatics Division, NIC M.P. It has been developed for M.P. Rural Road Development Authority (MRRDA). Huge efforts are being made towards creation of Enterprise Spatial GeoDatabase comprising of entire road network (NH to village roads), habitation locations, railways, major water bodies etc. for entire state. Development is taken on J2EE platform..Restricted access to use this application is available at <http://gismp.nic.in> .

i-GeoApproach Application was recently reviewed by Secretary, Dept. of Information Technology, GoMP, wherein he appreciated the efforts in the development & termed them “pioneering”.
