NIC, MP bags CSI-Nihilent E-Governance Award

HT Correspondent
Bhopal, November 12

NATIONAL INFORMAT-ICS Centre (NIC) Madhya Pradesh has bagged the prestigious CSI-Nihilent E-Governance Award for developing people friendly software E-Gram Suvidha.

NIC, Madhya Pradesh Technical Director Vivek Chitle received the award at a function held at Hyderabad today. Chitle has been instrumental in developing the E-Gram Suvidha software, which is a geomatics-based decision support system for creating and managing village level facilities in rural areas.

E-Gram Suvidha covers about 20 facilities under 10 major sectors including education, health, communication and roads.

Zila Panchayat Chhattarpur is successfully using the software.

Other Panchayats are also adopting it for multiple benefits, which mainly include better management of facilities, achieving transparency and simplicity in planning process, efficient updating of thematic maps, faster response and promote corrective action to the changing ground realities.

MPNIC bags e-governance award

By Our Staff Reporter

Bhopal, Nov 12

The National Informatics Centre (NIC), Madhya Pradesh has bagged the prestigious Nihilent e-governance award, instituted by the Computer Society of India, for developing people-friendly software, e-Gram Suvidha.

Technical Director of National Informatics Centre Vivek Chitle received the award at a grand award distribution ceremony held at Hi-tech City Centre Hyderabad on Saturday.

Ex-Governor of Jammu and Kashmir and former

Chief of Army Staff KV Krishna Rao presented the award.

According to an official press statement issued here on Saturday, Chitle has been instrumental in developing the e-Gram Suvidha software, which is a geomatics based decision support system for creating and managing village level facilities in rural areas.

The software provides an interactive and user-friendly interface for map-based outputs.

Digitised features of locations and boundaries of blocks, Panchayats, villages, road and railway network could be viewed

easily.

The e-Gram Suvidha covers about 20 facilities under 10 major sectors including education, health, communication and roads.

District Panchayat Chhatarpur is successfully using the software, and other Panchayats are also adopting it for multiple benefits, which mainly include better management of facilities, achieving transparency and simplicity in planning process, efficient updating of thematic maps, faster response and prompt corrective action to the changing ground realities, the release added.
